

DUROSTICK DS-50

Reinforcing polyester fabric for waterproofers

■ PROPERTIES

Very strong reinforcing (thin) polyester fabric, of 50gr/m² weight. It is applied to reinforce (sections or the entire surface) brushable elastomeric waterproofers, such as TECHNOPROOF, No39, DS-220 and HYDROSTOP-PU of DUROSTICK, when dealing with difficult applications, such as roofs with extensive cracks.

It provides ease of application and laying, increases tensile strength, protects against cracking and extends the life of the final waterproofing coat. Also available in 10cm and 20cm wide strips for spot reinforcement of joints, cracks, and floor-to-wall joints.

■ PACKAGING

Roll 1m x 50m, 10cm x 10m,
10cm x 20m, 20cm x 10m, 20cm x 20m.
