

BIOCLEAN

Biodegradable hand cleaning cream

■ PROPERTIES

Biodegradable cleaner without ammonia, phosphates, and petroleum products, per the European directive EC 648/2004 governing detergents in terms of their biodegradability. Due to the glycerin and exfoliating granules contained in its composition, it is gentle on the hands and has a high cleaning effect. In addition, it removes unpleasant odors, leaving a scent of freshness. Adapted to the skin's natural pH value, it is suitable for frequent or even daily use.

■ APPLICATIONS

BIOCLEAN hand cleaning cream is necessary for workers and individuals performing manual tasks wishing to effectively clean their hands.

Ideal for car garages, mechanics, printing specialists, plumbers, blacksmiths, as well as painters etc. It dissolves oils and grease, ink, smudges as well as paints and tar.

■ USE

A minimum quantity of cleaning cream is enough to clean tough stains from the hands. Use in the same way as one uses hand soap. Rub your hands together and once all the dirt is dissolved, rinse them with plenty of water.

■ STORAGE

Avoid direct exposure to sunlight, very high temperatures and frost. Stored in this way, the product is maintained for 24 months from production date.

The technical specifications and directions of use contained in this technical data sheet are the results of the knowledge and experience of the company's research and development department, as well as from the real-life applications of the product. The recommendations and suggestions regarding the use of the products are made without guarantee since the respective conditions during their application are beyond the control of the company. For this reason, it is the user's responsibility to make sure that the product is suitable for the intended application as well as the application conditions of the project.
