

DUROLUX AQUA

Waterborne acrylic enamel paint for wood & metal

■ PROPERTIES

Water soluble acrylic enamel paint. Distinguished for its long lasting, excellent whiteness that does not yellow over time. Apply it on new and existing surfaces already painted with solvent-based enamel paints. Works easily and spreads evenly on surfaces without creating brush or roller marks (paint lapping). It has great performance and coverage. Its application creates a flexible surface with great resistance and durability to adverse weather conditions as well as frequent washing. The coated surfaces are highly resistant to chalking. The fact that is odorless makes it ideal for children's rooms, schools, and hospitals.

■ APPLICATIONS

DUROLUX AQUA acrylic enamel paint suitable for painting all types of wood constructs, such as doors and windows, as well as pergolas, fences, closets, cabinets and furniture. Metal surfaces have to be coated with suitable corrosion protection first. Apply 2 coats METAL PRIMER of DUROSTICK first.

■ USE

1. Surface preparation

Proper preparation ensures excellent results on both wood and metal surfaces. All, to be coated surfaces have to be thoroughly clean, dry and free from oils, rust (*), and dust.

New wood surfaces

Sand all surfaces using the appropriate sandpaper. Ensure protection from fungi and wood-boring insects by using the clear, water-soluble impregnating preservative DUROXYL Aqua TOTAL WOOD PROTECTION of DUROSTICK. Once dry, spackle with STUCOFIX putty, or, if necessary, DUROWOOD wood putty as needed, and apply 1-2 coats VELATOURA AQUA. Complete the project by applying 2 coats DUROLUX AQUA.

Existing wood surfaces

Carefully remove any loose paint with the appropriate sandpaper. Prime all surfaces with a coat of solvent based VELATOURA or VELATOURA AQUA (if needed). Following, apply 2 coats DUROLUX AQUA of DUROSTICK.

DUROLUX AQUA

Waterborne acrylic enamel paint for wood & metal

New metal surfaces

Carefully remove any rust, and clean with THINNER 101 of DUROSTICK or white spirit. Once dry, prime all the surfaces with two coats of METAL PRIMER. Finally apply 2 coats of DUROLUX AQUA of DUROSTICK.

Existing metal surfaces

Thoroughly remove loose paint and rust with emery paper or steel wool.

Prime with 1-2 coats METAL PRIMER (if the existing paint is flaking). Once dry, continue with 2 coats DUROLUX AQUA of DUROSTICK.

(*) Rust can be removed using RUST REMOVER of DUROSTICK before the application of the product.

2. Application

Mix well before use. The water-based enamel paint DUROLUX AQUA can be applied with a roller, a brush or an airless sprayer. Dilute by 5-10% using clean water.

■ CLEANING

Clean all tools with plenty of water, and continue with the use of a mild detergent, immediately after use.

■ COVERAGE

Approximately 10-13m²/lt per coat, depending on the absorbency of the substrate, the painting conditions and the application method.

■ STORAGE

Store in closed containers under normal storage conditions, for 18 months from production date.

■ SAFETY DIRECTIONS

The product needs no hazard labeling under current European and National legislation. However, it is recommended to keep away from the reach of children. If swallowed, seek immediate medical advice and show the container or label.

■ PACKAGING

Carton box with 12pcs of 750ml each one
Carton box with 4pcs of 2.5lt each one

TECHNICAL SPECIFICATIONS

■ Form - Color	Thixotropic liquid - White
■ Colors	Pal and Transparent bases are colored via the COLOR COLLECTION system in any desired color. The white color of DUROLUX AQUA is colored in 120 PAL (light shade) colors via the DUROCOLOR system.
■ Resin	Acrylic
■ Density	1.22±0.02kg/lt
■ Viscosity	1850±300 cP (spindle 3/20 rpm)
■ Solids by weight	50-52% w/w
■ Solids by volume	37-39% w/v
■ pH	8.50±0.50
■ Gloss	Satin, gloss
■ Block Resistance	0-1 (ASTM D 4946-03)
■ Hardness per König	50±15 sec (ELOT EN ISO 1522-00)
■ Gloss 60° (Gloss)	79-88 (ELOT EN ISO 2813-99)
■ Gloss 60° (Satin)	40-52 (ELOT EN ISO 2813-99)
■ Application temperature	From +10°C to +35°C
■ Dilution	5-10% by volume with clean water
■ Drying time	Approximately 1 hour (touch dry), depending on the ambient conditions (humidity, temperature)
■ Recoating time	After 5-6 hours, depending on the ambient conditions (humidity, temperature)

V.O.C. (Volatile Organic Compounds):

Limit value of maximum VOC content per EU (Directive 2004/42/CE) for the particular product (Class A/d: 'Interior/exterior trim and cladding paints for wood and metal' Type WB): 130gr/lt (2010). The ready to use product contains maximum 12gr/lt V.O.C.
