

7.2 Special application cleaners

DUROSTICK ALUMINUM CLEANER

Cleaning agent for aluminum surfaces

PROPERTIES

Powerful active cleaner. With just one spray, it easily removes pollutants from exhaust gases, dirt, mud rain, salts and fresh waterborne paint splashes (two to three days old at the most).

APPLICATIONS

Aluminum CLEANER is ideal for use on unpainted, anodized or powder coated aluminum frames (pic.1, 2, 3), without altering or affecting their original color.

USE

It is recommended, purely preventably, to apply the cleaner on a hidden spot of the surface to be cleaned, so as to determine its color stability, before continuing with the actual application. Following, spray the aluminum parts that require cleaning and scrub lightly with a soft, cotton cloth or sponge.

Allow the product to act for 1-2 minutes and rinse with clean water and a sponge. Dry the clean surfaces with a cotton cloth.

TECHNICAL SPECIFICATIONS

Form	Liquid
Color	Transparent
Density	1.00 ± 0.05 kg/l
pH	9.00 ± 1.00
Flammable	No
Contains	Phosphates less than 5%, anionic surfactants less than 5%

General Chemical State Laboratory Reg. No. 17705/0/2014

Permit No. by General Chemical State Laboratory ELEFSIS: 3093/2008

STORAGE

Store in shaded places, protected from sunlight and frost, for at least 36 months from production date.

SAFETY DIRECTIONS

The product needs no hazard labeling under current European and National legislation. However, it is recommended to keep away from the reach of children. If swallowed seek immediate medical advice and show the container or label.

PACKAGING

Paper box with 12 pcs of 500ml each one
