

Blank Cartridge

For applying sealants and waterproofing products

PROPERTIES

The BLANK CARTRIDGE of DUROSTICK is ideal for applying any viscous (thick) material, in combination with the heavy duty, PROFESSIONAL CARTRIDGE GUN of DUROSTICK. It has the advantage of both, equal thickness product application and the option to reuse. It is important to promptly clean the cartridge with water, after the completion of application.

APPLICATIONS

A smart and affordable application system. Suitable for a multitude of applications, and practical for any user to seal and grout with.

It may be used to fill joints precisely and accurately. Use it with products such as: DUROSTICK sanded grouts around absorbent decorative bricks, rustic tiles, cotto and honed marble. Use it also for furniture adhesives and any other product in paste form. It is an affordable solution for grouting with epoxy systems, such as EPOXY and DUROPOXY. It is suitable for applying cementitious sealants, like SUPER FLEX POWDER, and D-1 with the addition of the acrylic emulsion, D-20 of

DUROSTICK. Use it also to apply the injectable resin, D-33 into cracks.

USE

Fill the cartridge and place the cap at the bottom end. Use a knife or blade to cut the tip of the treaded top of the cartridge. Screw the nozzle on the thread. Place the cartridge into the gun. With one non-stop motion, slide the nozzle along the length of the joint and fill it.

PACKAGING

Carton box with 48 cartridges of 310ml capacity each one

DUROSTICK S.A.
