### CONSUMPTION

Approximately 500ml/3m<sup>2</sup> of surface.

### STORAGE

Store in places with low humidity, away from any heat source, for at least 36 months from production date.

### SAFETY DIRECTIONS

The product is classified as harmful. It is recommended to keep away from the reach of children and apply it in well ventilated areas. Before use, refer to the cautions on the product packaging or the Material Safety Data Sheet.

### PACKAGING

Carton box with 15 pcs of 500ml each one 5lt container

### PROPERTIES

Extra powerful graffiti remover. It cleans surfaces made of metal and glass, concrete as well as plaster, marble, tiles and stone. It removes graffiti (pic.3) quickly and easily without leaving any stains and without damaging the painted surface. It cleans walls soiled with spray paint, permanent markers or ball point pens in areas such as children's rooms (providing there is adequate ventilation in the room).

### APPLICATIONS

D-19 GRAFFITI REMOVER of DUROSTICK is suitable for almost any surface. Cleaning graffiti from school surfaces and university facilities or public and private buildings (pic.1,2) with D-19 GRAFFITI REMOVER is particularly cost effective compared to repainting.

Ideal for cleaning graffiti from surfaces coated with the polyurethane paint DUROSTICK ANTIGRAFFITI. There is no reason to repaint those surfaces because the paint remains unaffected, even after repeated cleanings.

### USE

Spray the surface with DUROSTICK D-19 GRAFFITI REMOVER. Continue by scrubbing the surface using a soft cloth or sponge, depending on the surface. After removing the graffiti, rinse the surfaces with clean water. If it is necessary, repeat the process on porous surfaces with bold and persistent stains.

### ATTENTION

D-19 GRAFFITI REMOVER is a very powerful cleaner. It is recommended, before any application on any painted surface, to spot check the product.
