

# DUROSTICK DUROCLEAN

Chimney and wood burning stove cleaner

## PROPERTIES

Special purpose cleaning powder for removing soot residues that accumulate and 'line' chimney walls and wood burning stove ducts. Cleaning smokestacks, chimneys and ducts result in proper combustion, thus ensuring high thermal and efficient performance from the fireplace or the woodstove. DUROCLEAN cleans effortlessly in no time, without any assistance from a specialized technician or our own strenuous effort, easily and economically. This is why DUROCLEAN is considered ideal for restoring chimney and duct air flow.

## APPLICATIONS

Indispensable for home owners with fireplaces, barbeques or wood burning stoves, that aim for their proper performance. Use DUROCLEAN to ensure trouble-free combustion, without soot and maintenance expenses.

## USE

Light up the fireplace or the wood burning stove. Allow for one hour to pass, for the chimney or duct to become hot. Place DUROCLEAN in the fire as is, with the package intact. Do not open the container. The flame will turn blue. This means that the product is activated. The soot residues will soon start to come off. They will either fall into the fire or release through the chimney or the duct into the atmosphere.

## CONSUMPTION

2-3 times or more per year, depending on the use. If the fireplace or wood stove is used frequently, repeat the cleaning every 30 days.

## STORAGE

Store in dry and shaded places, for at least 12 months from production date.
