

7.4 Products for cleaning & protection of automobiles

DUROSTICK RIM CLEANER

PROPERTIES

The rim cleaner is a special purpose cleaning product for vehicle alloy rims and especially for aluminum and magnesium rims (pic.2).

It has a special acid-free formula that delivers quick, safe and effective cleaning action. It dissolves and removes quickly and easily all the dirt and grime from the road and the brakes. Clean all types of rims, and restore them to their lost luster.

APPLICATIONS

In addition to rims, it is also suitable for all wheel parts including plastic and metallic wheel hubs and even the tires themselves.

It can be also used for spot cleaning of any dirt on plastic parts where common cleaners are ineffective.

LIMITATION OF USE

Do not apply the cleaner on painted surfaces.

USE

Spray the rim (pic.1), or the surface to be cleaned, and rinse with water or use a wet sponge to rinse the surface. For difficult dirt, spray and allow for the product to work on the sprayed surface for approximately 5 minutes before rinsing.

In the unlikely case that is needed, repeat the procedure.
