

# ALUMINIUM CLEANER

---

Cleaning agent for aluminum surfaces

## ■ PROPERTIES

Powerful active cleaner. With just one spray, it easily removes pollutants from exhaust gases, salts, dirt, mud rain, and fresh emulsion paint splashes (2-3 days old at the most).

## ■ APPLICATIONS

DUROSTICK Aluminum CLEANER is ideal for use on unpainted, anodized or powder coated aluminum frames, without altering or affecting their original color.

## ■ USE

Preventive spot application is recommended, ideally in a hidden part of the surface to be cleaned, to verify the stability of the color of the aluminum surface to be cleaned.

Subsequently, spray the aluminum parts that require cleaning and scrub lightly with a soft, cotton cloth or sponge.

Allow the product to act for 1-2 minutes and rinse with clean water and a sponge. Dry the clean surfaces with a cotton cloth.

## ■ STORAGE

Store in shaded places, protected from sunlight and frost, for 36 months from production date.

## ■ SAFETY DIRECTIONS

The product needs no hazard labeling under current European and National legislation.

However, it is recommended to keep away from the reach of children. If swallowed seek immediate medical advice and show the container or label.

## ■ PACKAGING

Paper box with 12 pcs of 500ml each one.
