

D-21

Cleaner for honed marble

■ PROPERTIES

Powerful cleaner for honed marble and mosaics. It easily removes stubborn stains, where common detergents fail, without leaving any marks.

■ APPLICATIONS

DUROSTICK D-21 permanently removes stains, created from the watering of plants, on balconies, and spaces lined with white or colored honed marbles. It removes stains from pets, air pollution and soot stains, rust from the railings as well as oils, grease, ink, wine, coffee and soft drinks etc. Use it in both interior and exterior spaces.

■ USE

1. Surface preparation

DUROSTICK D-21 is a very powerful cleaner. The use of protective eyewear and plastic gloves is highly

recommended, during application. Before applying, it is recommended to test the cleaner on a blind spot of the marble, to avoid any possibility of corrosion or clouding that is very rarely observed in limited types of colored marble.

2. Application

Apply D-21 as is, undiluted to the surface, and lightly scrub using a sponge or a broom for up to a minute. When working with highly absorbent marble, repeat the process. Follow by rinsing with plenty of water, immediately after application.

When used as part of the protective system for marble, after cleaning apply on the thoroughly dried surface, DUROSTICK D-22 (water and oil repellent) or NANO PROOF MARMO DS-275, thus avoiding the necessity of frequent cleaning. The application of DUROSTICK D-25, self-polishing product for floors

D-21

Cleaner for honed marble

made of marble, honed granites and cotto, will restore their lost luster. Maintain that luster effect by periodically adding a minimal quantity of the polish into the mopping water.

■ CONSUMPTION

1lt/5-6m² of surface.

■ STORAGE

Store in shaded places protected from frost, for 36 months from production date.

■ SAFETY DIRECTIONS

The product is classified as corrosive. It is recommended to keep away from the reach of children and apply in well ventilated areas. Before use, refer to the cautions on the product packaging or the Safety Data Sheet.

■ PACKAGING

Carton box with 15pcs of 1lt each one 5lt, 20lt containers.

TECHNICAL SPECIFICATIONS	
■ Form - Color	Liquid - Transparent
■ Density	1.05±0.05kg/lt
■ pH	0-1
■ Application temperature	From +5°C to +35°C
■ Scent	Lemon
■ Among others, it contains 10% phosphoric acid, citric acid and less than 5% non-ionic surfactants	

Permit No. General Chemical State Laboratory ELEFSIS 3093/2008.
