

D-13

Plastic guides for installing glass blocks

■ PROPERTIES - APPLICATIONS

D-13 glass block spacers are suitable for installing glass blocks using the adhesive D-3. Easy to apply, they give great stability and accuracy during installation. They are necessary to maintain even joints between glass blocks, of any size or shape. Their key features are their smoothness and their great strength.

■ USE

DUROSTICK D-13 Plastic guides function as a base, in order to accept the glass block with the adhesive, between the guide's sides.

Allow for 5-8 minutes to pass and remove the plastic part of the guide which protrudes from the glass block. Continue by grouting around the glass blocks using the adhesive used to install the blocks.

■ CONSUMPTION

Approximately 25 pcs/m², depending on the size of the glass blocks.

■ PACKAGING

Box with 200 pcs

DUROSTICK S.A.,
